

Location: Burlington, Colorado, West United States,USA

Company: Eastern Colorado Seeds, LLC
Apply below

Industry Sector: Agribusiness
Industry Type: Crop Production
Career Type: Farm Manager
Job Type: Full Time

ECS is looking for a Farm Manager in Eastern Colorado to manage a large seed production farming operation which will include both dry land and irrigated crops.

What's in it for you:

- Being part of a large production farming operation that is continuing to grow its production.
- Managing a team of roughly 4-6 people at any given time, depending on the time of season.

What you will be doing:

- Leading a team on the production farming operation dealing with dry land and irrigated crops.
- Working with distribution companies on best prices for products used on the operation.
- Keeping the farm in compliance with FSA and crop insurance.
- Working with the owner on making sure the operation is running at peak performance.

A successful candidate for this Farm Manager will possess the following:

- Past production farm operation management experience of at least 5 years.
- Willingness to be part of the team to put the time into the farming operation.
- Operation of equipment during the season.
- Have lead a team specifically on a farming operation.

Compensation: For a qualified candidate, the salary range for this role will be in the \$70-80K range.

Benefits: The operation will offer full benefits to a qualified candidate.

Desired Location: The location for the Farm Manager is Eastern Colorado and relocation will be provided for a qualified candidate.
